

SAVE THE DATE

Geomicrobiological and Geochemical Colloquium

Seminar Program Jan-Jun 2023

Dr. Christoph Keuschnig

Jan 10th

Helmholtz Centre Potsdam German Research Centre for Geosciences
Microbial communities in soil, snow and ice

Dr. João Pedro Saraiva

Feb 7th

Helmholtz Centre for Environmental Research (UFZ), Germany
Recovery of 193 Eukaryotic bins reveals major challenges for Eukaryote genome reconstruction from terrestrial metagenomes

Prof. Ivan Berg

Mar 7th

Westfälische Wilhelms University Münster
Autotrophic CO₂ fixation pathways in changing environments

Dr. Anna Karnkowska

Apr 4th

University of Warsaw, Poland
Establishment, evolution and fate of secondary plastids

Dr. Roland Hatzenpichler

May 2nd

Montana State University, USA
Generation Physiology and correlative microscopy approaches to study microbial phenotypes

Dr. Sebastian Hess

Jun 6th

University of Cologne, Germany
Diversity and interactions of microalgae: from species to molecules

At 3PM on the 1st Tuesday of every month in person or on zoom

GFZ
