

RADDUSCH OHNE WASSER

On the 29th and 30th of September, a festival of arts and sciences will take place in the Naturhafen Raddusch. Sound installations, theatre performances, film, talks and activities will fill the two days-inviting discussions, learnings and celebrations.

The festival is the cumulation of several months of artistic research which has explored the actors (human and non) and stories which make up an imaginary cubic 10 metres on the Naturhafen Raddusch.

It is cooperation of the theatre collective [AnthroposEx](#) and the project [AnthropoScenes](#) and is funded by the Berlin University Alliance within the framework of the Excellence Strategy of the German Federal and State Governments.
